ENGINES

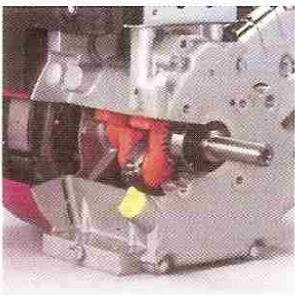

THE MAXIMUM POWER THAT WORKS FOR YOU

New OHV Kerosene Engines

12K 332

Dura - Bore cast iron cylinder sleeve withstand wear and abuse while providing improved oil control.

Metal cam, forged crankshaft and two ball bearings on PTO and flywheel side improve durability and serviceability.

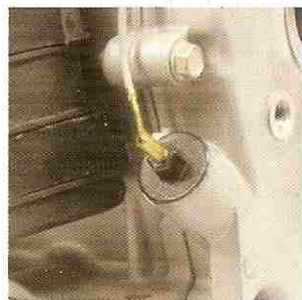

Overhead valve design runs cooler, more fuel efficient, cleaner.

Unique One-Step Gasoline Primer

Easy to access foam filter is designed for easy cleaning and long term use.

Run Sense : Reduce chance of engine damage due to insufficient lubrication.

Easy access gas filter improves running in harsh environments and promotes longer engine life.

Unique one-step gasoline primer. No need to drain the carburetor. Easy to use.

BRIGGS & STRATTON

**The World's
1 Engine
Manufacturer**

Nobody in the world builds more types of engines to do more types of jobs than Briggs & Stratton. For nearly a century, Briggs & Stratton has been the preferred engine choice for outdoor power equipment. No other engine manufacturer matches our tradition of quality, performance and value. People have come to depend on Briggs & Stratton products to get the job done.

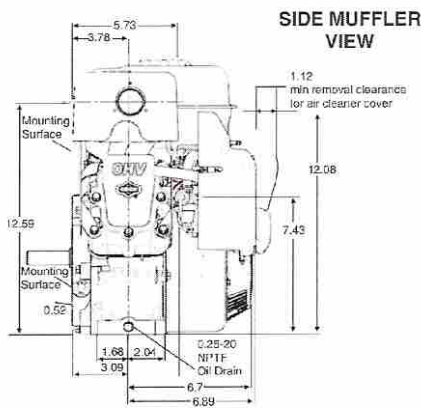

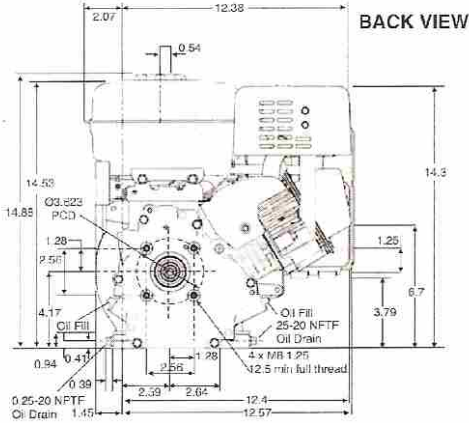

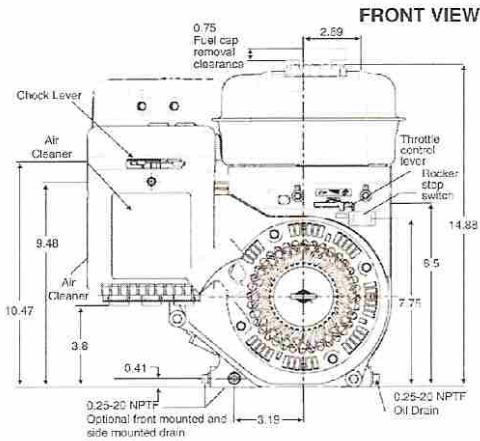

DURABLE

From raw materials to finished engines, Briggs & Stratton manufacturing excellence is unsurpassed. Through a unique combination of innovative technology and quality manufacturing, Briggs & Stratton is able to offer its customers products that meet or exceed their demanding requirements and are durable, reliable and perform under the most extreme conditions.

EFFICIENT

Briggs & Stratton engines provide years of worry-free service. Every detail is designed around your needs for more hours on the job and less time on maintenance. The heavy-duty construction, with features like the Dura-Bore cast iron cylinder sleeve and two-ball bearings on PTO and flywheel, means a Briggs & Stratton engine has the durability to handle wear and abuse. Easy-access filters are designed for quick cleaning and long life. Whatever the job, a Briggs & Stratton engine delivers the quality and rugged, long-term performance you expect.

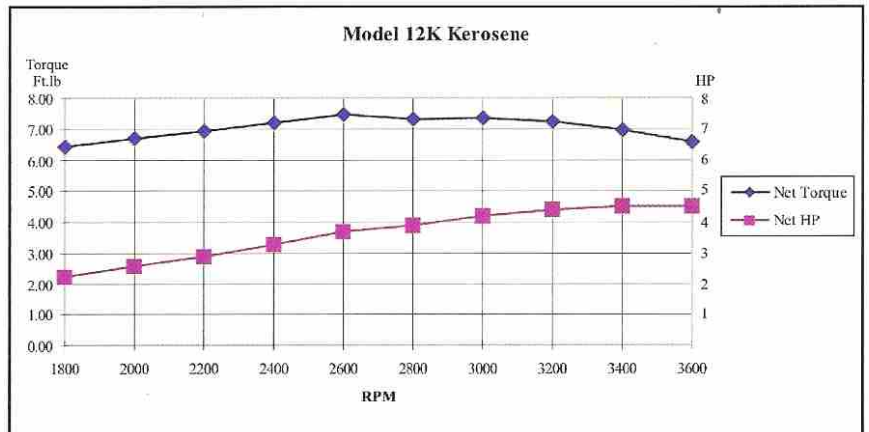

DEPENDABLE

All Dimensions are in inches

MODEL	12K 332 (INDUSTRIAL/COMMERCIAL)
HP	4.5 HP
Displacement	190 cc
Muffler	Super Lo-Tone
Fuel Capacity qt (L)	4.0 qt (3.79 L)
Lube Oil Capacity oz (L)	20 oz (0.60 L)
Dry Weight lb (kg)	34 lb (15.31 kg)
OHV	Yes
Cast Iron Sleeve	Yes
2 Ball Bearing	Yes
Foam Filter	Yes
Splash Lubrication	Yes
Ignition	Magnetron
